Tried valiantly to QSO with Bob 'n' Sandy 'n' etc. last night  
on 3579. I actually coaxed 250 W out of the TR-3 but nobody  
heard me! Sigh.

Will try off and on today for 7050, again using the TR-3.  
Dang, no sidetone, so I will be using my Eldico tube keyer  
which is pictured on John Brewer's website ([www.zynet.com/~johnb](http://www.zynet.com/~johnb)).  
Hope I can work some of you! Bob, any thoughts on a 20M  
QRG? Post to the List so I'll spot it quickly. <grin>

Bob, your BC-375 was perfectly readable at 25W here in MA.  
Sandy, your TPTG was readable but wispy. What's the output  
on that marvel?

Darn it, I think on 80m my lil' 40' wire is beaming my RF straight into the flowebed. :-)

73,
